

## World Patient Safety Day

17 September 2020

Announcing World Patient Safety Day 2020

World Patient Safety Day – 17<sup>th</sup> September 2020

In today's world of COVID 19 the safety of patients is paramount and cannot be comprised. Since March, we have been working hard to ensure that we continue to offer great quality and safety training to all our customers using a blended learning approach, guaranteeing that we continue to provide the sufficient knowledge and skill needed to deliver safe patient care.

For example our Basic Life Support training theory is delivered through our virtual classroom followed by a 15 minute case scenario practical assessment session. Our Fire Safety Awareness session is delivered virtually engaging learners throughout the session with videos, polls and group discussion.

Our infection prevention and control training and our PPE training have supported increasing patient safety and we are delighted to have been instrumental in facilitating Virgin Care to achieve 95% compliance through our donning and doffing training. We know that being able to record compliance gives great reassurance to customers and their services users.

We understand that patient safety is the cornerstone of the NHS values and forms the foundations of many of our learning resources. You can access individual sessions such as our Virtual Consultation, Deteriorating Patient and Mental Health Awareness. These are just some of modules available as well as our new suite of safeguarding training delivered via eLearning.

Please visit our [course directory](#) to access any of our training modules or if you would like something more bespoke for your business [contact us](#).
